

HUDDLE ESSENTIALS

ESSENTIAL COLLABORATION PERFORMED MORE EFFICIENTLY

Small/Mid-Size
Meeting Room

THE ALL-IN-ONE AMX ACENDO VIBE

The AMX Acendo Family is the ideal scalable solution for conferencing solutions in meeting rooms from a basic set up to enterprise level.

AMX Acendo Vibe all-in-one video conferencing sound bar is made with premium materials, suitable for executives and smaller meeting rooms.

With built-in signal processing and Acoustic Echo Cancellation to enhance your video and audio experience, it connects to a computer or laptop via USB for easy accessibility and comes with a wireless desktop remote for source select, Bluetooth phone calling, volume and mute functions. Connectivity is seamless to your favourite web-based video conferencing platform.

- **Sound by JBL** - integrated JBL speakers (tuned for video conferencing), AKG far-field microphones, and DSP algorithms.
- **Wide-angle Camera (110 FoV)** - The wide-angle camera means that everyone in the room can be seen.
- **Elegant Design** - Available in Black or Light Grey. Made with premium materials for modern office environments
- **CEC Display Control** - Acendo Vibe will turn the display on and off in response to triggers eg by plugging a laptop into Acendo Vibe, the display will turn on and show the laptop content - all done with no additional cables or programming.
- **USB & Bluetooth Connectivity** - for BYOD applications with a user's laptop or tablet etc
- **Integrated Mounting Bracket** - the Acendo Vibe can simply be placed on a table surface or you can use the included wall mount bracket. Can be installed by one person.
- **Wireless Desktop Remote Control** - Volume control, source selection, mic mute and Bluetooth pairing for mobile devices
- **RS-232** - 3-pin captive-wire connector for Serial commands

HUDDLE ESSENTIALS TYPICAL INSTALLATION

This example solution is for smaller huddle spaces. It allows the user to connect wirelessly or via the optional Hydraport cable management system on the table. Any web-based meeting platform can be accessed.
