

# HUDDLE PREMIUM

PREMIUM COLLABORATION FOR ENGAGING MEETINGS

## ALL-IN-ONE ACENDO VIBE

The AMX Acendo Family is the ideal scalable solution for conferencing solutions in meeting rooms from a basic set up to enterprise level.

AMX Acendo Vibe all-in-one video conferencing sound bar is made with premium materials, suitable for executives and larger meeting rooms. Acendo Vibe allows for engaging meetings no matter the distance between table and main display.

With built-in signal processing and Acoustic Echo Cancellation to enhance your video and audio experience, it connects to a computer or laptop via USB for easy accessibility and comes with a wireless desktop remote for source select, Bluetooth phone calling, volume and mute functions.

A stylish tabletop cable management system retracts cables discretely allowing seamless connectivity to your favourite web-based video conferencing platform.

- **Sound by JBL** - integrated JBL speakers (tuned for video conferencing), AKG far-field microphones, and DSP algorithms.
- **Wide-angle Camera (110° FoV)** - Ensures everyone in the room can be seen.
- **Elegant Design** - Available in Black or Light Grey. Made with premium materials for modern office environments
- **CEC Display Control** - Acendo Vibe will turn the display on and off when a compatible video device is connected.
- **USB & Bluetooth Connectivity** - for BYOD applications with a user's laptop or mobile device.
- **Integrated Mounting Bracket** - included wall bracket facilitates installation by a single person, or simply place on a table surface.
- **Wireless Desktop Remote Control** - Includes a colour matched desktop remote control that connects wirelessly. Volume control, source selection, mic mute and Bluetooth pairing for mobile devices.
- **RS-232** - 3-pin captive-wire connector for Serial commands

## HUDDLE PREMIUM TYPICAL INSTALLATION

This example solution is for larger huddle spaces, where the distance between the table and the main display exceed standard cable lengths. It allows the user to connect wirelessly or via the Hydraport cable management system on the table. Any web-based meeting platform can be accessed.

### Table to Wall Huddle Space Considerations

- Distance between boardroom table and main display exceed standard cable length
- Additional inputs are required
- Dedicated Presentation Platform – AMX Acendo Core ACR-5100 as well as BYOD required
- Single CAT 6A cable between table and display
