With Bettear's Wi-Fi and Auracast Hi-Fi solutions, your audience can simply enjoy the moment using their own smartphones and hearing devices—no extra equipment, no hassle. It is all about streamlining Hi-Fi over Wi-Fi and Auracast™.

**No extra equipment. No hassle.**

**All in one: Complete audio solution powered by AI and DSP technology.**

**Hearing aids of all types can be easily connected**

**BYOD: Bring Your Own Device.**

**Effortless setup - Connect in seconds.**

# So, how does it work?

## Hi-Fi over Wi-Fi and Auracast™

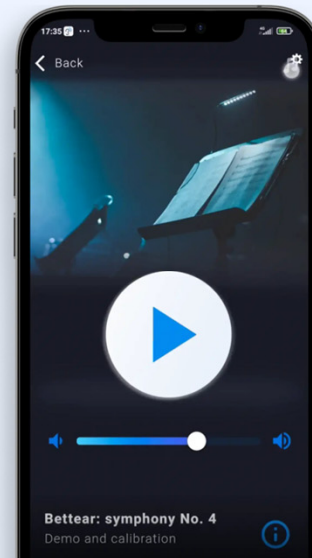

To overcome reverberant environments, background noise, and other challenging acoustic conditions, Bettear's devices connect directly to various audio sources, such as microphones or sound consoles, and efficiently sample the sound in real-time. It then streams the audio with low latency over Wi-Fi and Auracast™ to personal end devices such as smartphones, hearing-aids and many other hearable devices. Bettear offers an advanced hybrid mode to fully cover venues with Wi-Fi and Auracast™, ensuring the inclusive, high quality listening experience for everyone.

## Mobile application

Attendees can effortlessly access the Bettear app by downloading it from different application stores, free of charge. The setup is easy, and suitable for people of all ages and technical skill levels, letting them connect their own hearing aids or earphones. Once connected, they can enjoy a high quality, personalized sound.

## Audio personalization

Hard-of-hearing individuals, including those who experience any degree of hearing or cognitive decline, frequently encounter difficulties in comprehending and enjoying audio content to the fullest extent. Bettear offers manual customization and automatic calibration that guarantee an accessible, equitable, and exceptional listening experience.

**One solution.  
Endless opportunities.**
